Note. The red dotted lines in the above diagram, represent the river as meandered in the original survey made by B. Bentley D.S. in the Year 1820. The red figures show the contents of several tracts that have been sold by the United States according to that Survey. The black lines and figures show the meanders and contents of Islands N<sup>o</sup> 1 & 2 according to the survey now made by A. E. Van Ness. Island N<sup>o</sup> 1 contains now 92.10 acres. By comparing these surveys, one with the other, it appears that, in consequence of changes in the river, there has been a gain to this Island, since the original survey was made of 51.70 acres, 10.50 of which is from a fraction of Sec 31 T 14 N. R. 3 E which has been sold by the U. S. as containing 36.67 acres, and 41.20 is from a fraction of Sec. 6 T 13 N. R. 3 E, which has been sold in like manner, as containing 11.89, leaving for the content of the Island at the time when the original survey was made, 40.40 acres.

The above diagram of Islands in the White River in sections 6 & 7 and 31, in Townships 13 & 14 N. R. 3 W. and Mer. is strictly conformable to the field notes of their survey on file in this office, which have been examined and approved.
